ABOUT ME

A dedicated Software Engineer with a strong passion for mobile and web development, artificial intelligence, and UI/UX design. Experienced in developing scalable applications using Flutter, WordPress, and Firebase, with a focus on clean architecture and user-centered design. Skilled in building real-time AI models like True Lie Detection using FaceMesh, and managing end-to-end projects with modern tools and best practices. Motivated to create smart, reliable solutions that drive impact and innovation.

WORK EXPERIENCE

SOFTWARE ENGINEER

SMART (PVT) LTD - TRINCOMALEE, SL.

Apr 2022
to
Present

- Developed responsive and user-friendly WordPress websites, including WooCommerce eCommerce platforms and custom admin panels.
- Led end-to-end web development projects, managing client requirements, deployment, and UI/UX design.
- Handled domain setup, cPanel configurations, and web hosting solutions.
- Delivered graphic design and branding support including logos and visual assets.
- Collaborated with clients for ongoing support and maintenance of their websites.

SOFTWARE DEVELOPER INTERN (REMOTE)

CYBERWARDERS (PVT) LTD - JAFFNA, SL.

Jan 2022
to
Aug 2022

- Developed a fully functional Android mobile app for a Canadian restaurant using Flutter and Firebase.
- Integrated Firestore database for real-time order and menu management.
- Collaborated with remote development team to deploy the live app on Google Play Store.
